DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-14, 16-23 & 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) The term HMGs is indefinite because the acronym appears to be used in a plurality of different compounds e.g. HMG CoA or high mobility proteins. Clarification is requested.

SUMMARY

2. Claims 11-14, 16-23 & 27 are free of the prior art but rejected under 112 second paragraph. There is no prior art that teach or suggest the method of using the DNA compactions agents histone proteins, viral envelope proteins, phage envelope proteins, bacterial chromoid proteins, non-histone chromosomal proteins, HMGs and its derivatives to produce a circularized compaction agent by ligating DNA insert into DNA vector and producing a circularized

recombinant nucleic acid. There is much prior art on compaction agents but they do not teach or suggest the use of compaction agents in the formation of circularized vector rather are used to compact already produced DNA products for packaging.
